Supporting & Measuring the Growth of Students with Learning Differences

The curricular rigor in education poses real challenges for schools aiming to meaningfully include students with disabilities and developmental delays. Where do we find time to “pause” the hectic schedule and use evidence-based practices to teach the critical skills these students need for long-term success?

In this workshop, participants learn a new way to plan intervention and measure progress. We take curriculum standards and define measurable goals, individualize intervention strategies, and set up progress records using goal attainment scaling. The resulting growth plan streamlines intervention and data collection into a natural part of everyday routines.

This session will prepare participants to:

- ✓ Write measurable goals for students who need support
- ✓ Develop evidence-based strategies for growth
- ✓ Make data-based decisions to accelerate growth
- ✓ Measure and display progress easily
